

# The Accredited Certification Scheme for Individual Gas Fitting Operatives (ACS)

Fully accredited by the United Kingdom Accreditation Service (UKAS), our range of ACS courses covers the domestic, commercial and LPG sectors.

Our team of experts has many years of industry experience and works closely with various industry organisations to ensure they meet consistently high standards, examples of which are outlined below:

- We archive the assessment documentation, to significantly reduce the need for you to store paperwork.
- Assessors from other certification bodies regularly comment on the superior quality of our ACS assessment documentation.
- We update all approved ACS centres through our monthly newsletter.
- The average time from receiving assessment documentation to issuing the candidate's certificate is currently 5 working days.

To save you time and effort, we've designed our assessment centre quality systems to be simple and easily implemented by adopting just one generic system. For more information, please contact Richard Phipps, Certification Manager on:
