

The Oil Firing Technicians Assessment Scheme (OFTEC)

Fully accredited by the United Kingdom Accreditation Service (UKAS), our range of OFTEC qualifications includes OFT 101 (Pressure Jet Commissioning and Service), OFT 102 (Domestic Vaporising Commissioning and Service), OFT 105E (Domestic Oil Fired Installation and Energy Efficiency) and OFT 600A (Advanced Oil Tank Installation Course).

Our team of experts has many years of industry experience and works closely with various industry organisations to ensure they meet consistently high standards, examples of which are outlined below:

- We archive the assessment documentation, to significantly reduce the need for you to store paperwork.
- We update all approved oftec centres through our monthly newsletter.
- The average time from receiving assessment documentation to issuing the candidate's certificate is currently 5 working days.

To save you time and effort, we've designed our assessment centre quality systems to be simple and easily implemented by adopting just one generic system. For more information, please contact Richard Phipps, Certification Manager on:
